RE: Professionalism

Dear Mike,

I just wanted to pass on a commendation regarding Miguel and Michael. When the City of Grand Prairie needed a roadway striped in a hurry and you guys were back logged, you sent Miguel out to the roadway to perform long line striping with a hand cart.

It had always been my preference to use a long line machine to do this type of work. After hearing that, you insisted that Miguel would do a great job or Stripe-A-Zone would make it right. Well, I have to admit, you cannot tell that this roadway was striped by hand. Miguel is a machine.

Last week, you sent out Miguel and Michael to stripe about $\frac{3}{4}$ of mile on two separate roadways. This required some removal, layout, crosswalks, stop bars, arrows and some only's. I was skeptical that it would be finished in 1 day, much less 6 hours. When I arrived on the job-site, Michael approached me up front and introduced himself to me. He immediately inquired about what I wanted done and how I wanted it done. What I wanted and how I wanted it, was exactly what I got.

In closing, just let me say that these two men are first class markings professionals. Stripe-A-Zone should be proud of these two men and feel very confident with their professionalism in the business as well as pavement markings installation.

Thank You,

Dane Stovall
Senior Traffic Engineering Technician
